DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1- and 11-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase “accurate forward projection” is indefinite as it is unclear what constitutes and accurate forward projection as opposed to a regular forward projection, since it is neither defined in the claims nor in the specification. As such, any forward projection will be considered as accurate enough.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zeng *et al.* US 6,381,349 B1. Zeng *et al.* shows all of the features of the instant invention including iterative computed tomographic reconstruction accounting for scatter and using maximum likelihood (abstract, column 2 lines 20-36, column 5 lines 13-45, and column 7)

Allowable Subject Matter

5. Claims 7-10 and 19 are allowed.
6. Claims 11-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. Claims 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
8. The following is a statement of reasons for the indication of allowable subject matter: in the claims as claimed, claims 2-4 address an iterative computed tomography reconstruction method using forward projection and either polychromatic x-ray modeling or finite beamwidth considerations in the forward projection, and claims 7-19 address a method or computer program for iterative computed tomography reconstruction where prior outer edge information from a modality in addition to CT is used along with transformation to a projection domain where a corrected or correction image is created from the measured and calculated sinograms. These features are neither shown nor fairly suggested in the prior art.

Conclusion

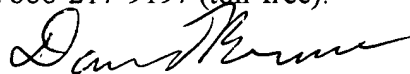

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wu *et al.* US 2005/0105679 A1 shows increased accuracy by using cone-beam forward projection, Edic *et al.* US 2003/0103666 A1 shows an iterative CT reconstruction, and De Man *et al.* US 6,724,856 B2 shows iterative CT.
